

## Task 6)

Upload a resume to an S3 bucket and share it with HR using a temporary access link that expires after 3 hours. Public access and static website hosting must remain disabled.\

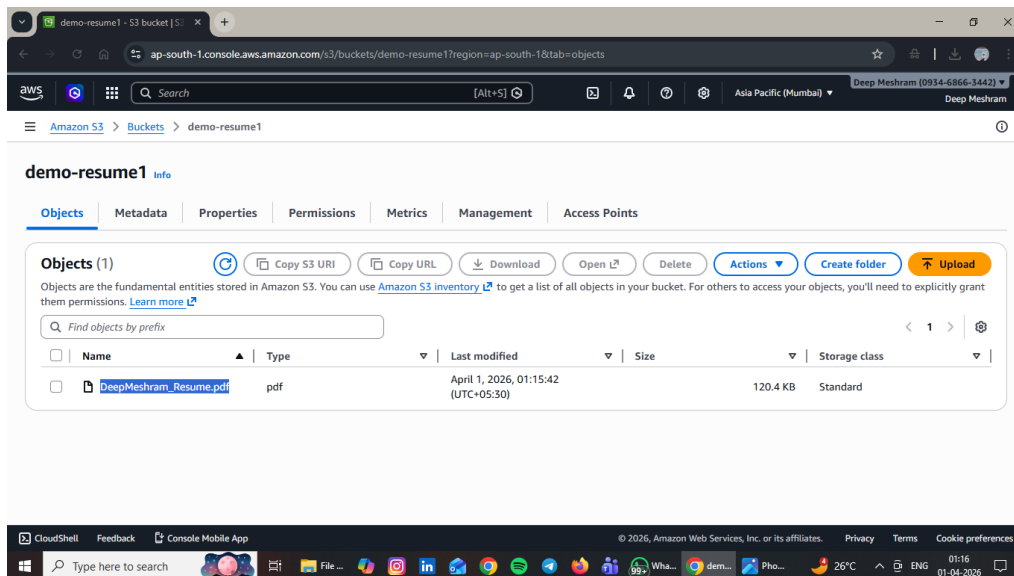

### Step 1: Create S3 Bucket

Go to S3 → Create Bucket, enter bucket name, and keep Block Public Access ON

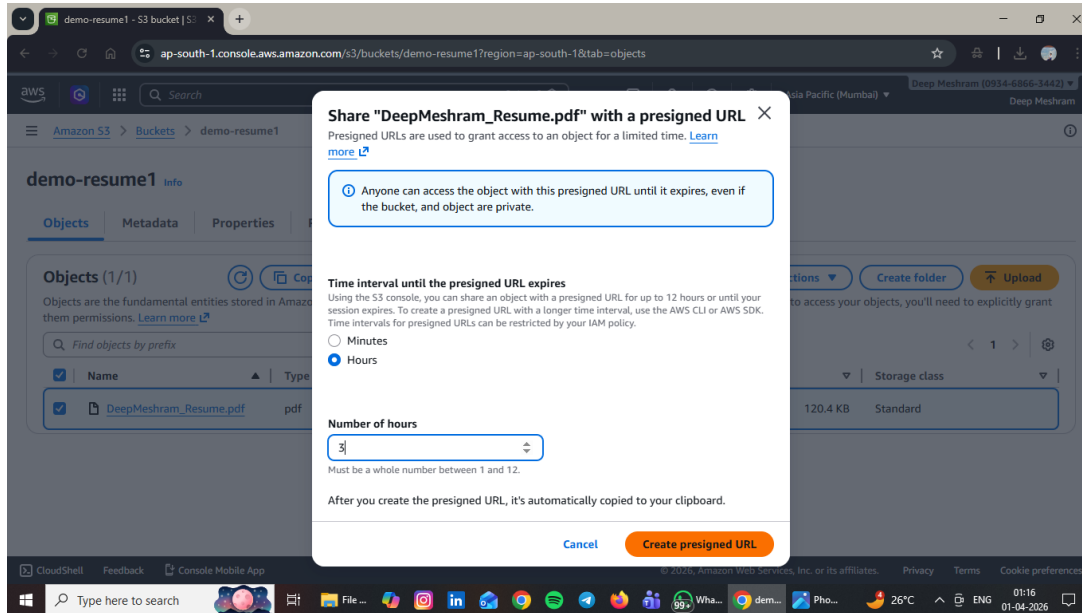

### Step 2: Upload Resume

Open the bucket → Click Upload → Upload your resume file.

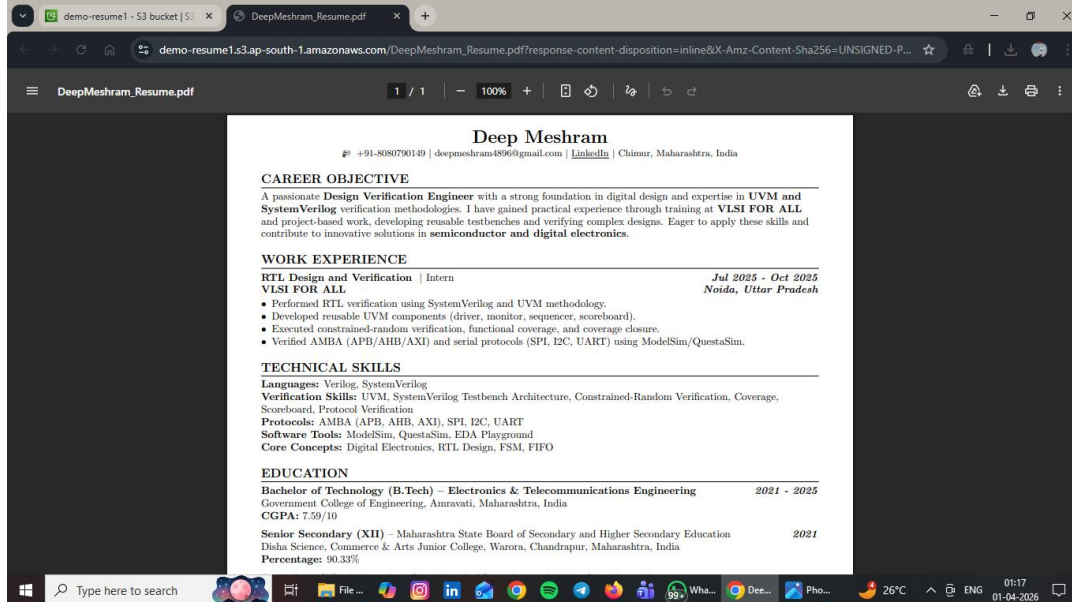

### Step 3: Generate Pre-Signed URL

Open the uploaded resume → Go to Object Actions → Share with a presigned URL → Set expiration time 3 hours → Generate URL.

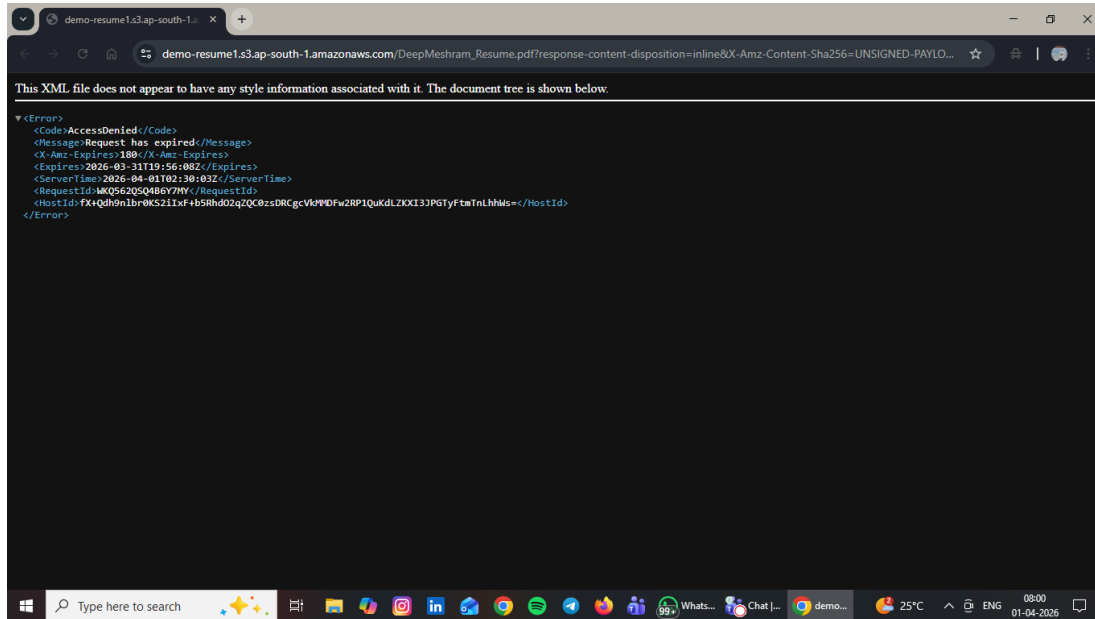

### Step 4: Verify before Expire the Presigned URL

## Step 5: Verify Link Expiration

After 3 hours, open the same link again. Access will be denied because the link has expired.

## Result:

Resume shared securely using Pre-Signed URL without enabling public access or static website hosting. The link automatically expired after 3 hours.
